

# NATYVA SOUL-FUSION SWITZERLAND

In their relatively short career, NATYVA has continually performed throughout Switzerland, taking their public by surprise with their genre-blending songs. The four-piece band is currently working on their third EP „WANNA/BE“.

The band's journey began with a common fascination for the likes of Snarky Puppy and Alfa Mist. From there, a friendship was forged and reinforced through

their playing. Each band member draws their musicality from a very different source, ranging from the realms of metal, French music, classical music, as well as African and latin grooves. The four avid musicians join together to create what they call "Soul Fusion", a multicultural musical universe with lyrics in English, French and Spanish.

Their second EP "CO/RAZÓN" was released in March 2022, which can be listened to [here](#).

Their next EP "WANNA/BE", to be released in 2023, will only reveal a new facet of their freshly paved journey.

## CONNECT WITH US

# CO/RAZÓN

Lover, parent, sibling, child...

Different roles conjure various needs and virtues, which always relate to the head and the heart. Sometimes, they fight for space within us. Sometimes, they complement each other. Sometimes, we suppress one to listen to the other. Our understanding of them is ambivalent and continues to be over the course of our lives as we evolve and change roles.

Following our debut EP FR/AGILE from October 2020, we have come together to create CO/RAZÓN, our latest five-track EP, which was released in March 2022. It evokes the struggle and the duality between reason and emotions under different circumstances. The sounds of the track are raw, harmonious but ambivalent, just as we are as human beings. Thanks to a competition won at REC4YOU, a part of the album has been produced in collaboration with Romain Equey (sound engineer at ro\_sound studio) in La Tour-de-Peilz.
